Experience

PC TECHNICIAN LEVEL 1 | GCIT | AUGUST 2022-PRESENT

- Configure, troubleshoot, and repair equipment, devices, and software on a 4-campus educational network
- Assist with the management and development of a large-scale MySQL database
 - Develop quality-of-life solutions to its respective front-end inventory system using C# and XAML
- Efficiently respond to network security threats, such as phishing, malicious devices, and virtual intruders
- Utilize a web-based ticketing system, Microsoft Endpoint Manager, and Azure Active Directory to address technical, networking, and security issues

STUDENT TECHNICIAN | GCIT | MAY 2021-JUNE 2022

- Provided technical support across a multi-campus school district with 1600+ students and 500+ staff
- Created documentation and procedures that increased team efficiency and overall knowledge of asset management, configuration, and locations
 - Wrote and proofread several documentation and procedure files for the configuration of new campus and student testing equipment and devices
- Singlehandedly completed over 230 technical support tickets as of May 2022, alongside many cooperative tickets and projects
